PRESS RELEASE

Bandar Seri Begawan, 23/11/2019

NuaraSAFE HSE Management System – Release of Brunei Edition.

Report. Investigate. Protect. – Its' HSE Management made simple.

NuaraSAFE is a web-based and fully integrated Health, Safety & Environment (HSE) Management software that allows for easy and efficient reporting, tracking and management of incidents, near misses, audits and investigations.

The core software engine of NuaraSAFE is built on German technology and over the years, has been proven across industries and company sizes. The Nuara team is pleased to release the NuaraSAFE Brunei edition to the local market which has been tailored to suit the needs of Bruneian companies and organizations.

What makes NuaraSAFE so unique?

- NuaraSAFE supports HSE Departments with capturing HSE related information and ensuring compliance with guidelines and regulatory requirements thus allowing for effectively risk mitigation in the workplace.
- Complete inspections, record near misses, report incidents and track investigations from anywhere and in real-time thanks to the system's web-based interface.
- Allow users to include detailed descriptions, upload supporting images and pinpoint locations by geo-tagging incident locations.
- Categorize incidents by type, location, and more, and configure automatic stakeholder notifications.
- Complete Risk Assessments
- Assign corrective actions to department focal points and track the status of completion in real-time.
- Set alerts and reminders for actions near due date to ensure effective implementation.
- Control the flow of sensitive information. Give users specific access right according to their job role.
- Easily maintain and access all of your company's HSE records in a secure and centralized system.
- Track HSE KPIs in real-time via the system's dashboard and advanced reporting capabilities.
- Evaluate the data gathered and increase awareness and organizational learning as part of your continuous improvement efforts.
- Customize features according to your requirements and organizational needs.

Quote from Nuara Group's Managing Director (Barbora Grexa): "A suitable HSE Management System will help you eliminate inefficiencies and reduce the time it takes to take action. By having key data available at your fingertips, increased transparency and accountability is ensured. This in turn will help you to draw better analysis in order to make better decisions. With all those factors in place, the consequence is a decrease in operational risks which will ultimately also help you reduce costs."

Quote from Nuara Group's Corporate Executive (Dk Hazimah Pg Sabri): "With NuaraSAFE being web-based, it ensures accessibility to all staff and promotes quick and effective action to mitigate risk and increase safety"

The Nuara team also added, that there are several exciting features in the NuaraSAFE pipeline including but not limited to an add-on module for Permit to Work (PTW) Management as well as real-time on-site personnel tracking likely to be released in 2020.

About Nuara Group

Nuara Group has over 25 years of experience in the software industry. The company started in the 1990's as a family business in Germany and established its ASEAN presence in Brunei 2016.

We at Nuara specialize in three core areas; IT Services, Software Development and ICT Consultancy but our core strength lies in our software development capabilities. Over the years we have worked with private companies, stock market listed companies, governments and NGOs. We have been providing innovative yet reliable solutions across industries and sectors.

We strive to become the most professionally managed, technically competent and trusted service provider in the South East Asian region. It is the company's mission to provide value adding services, while operating with full transparency and integrity.
